

Work Tickets

Easily Assign Tasks to Students

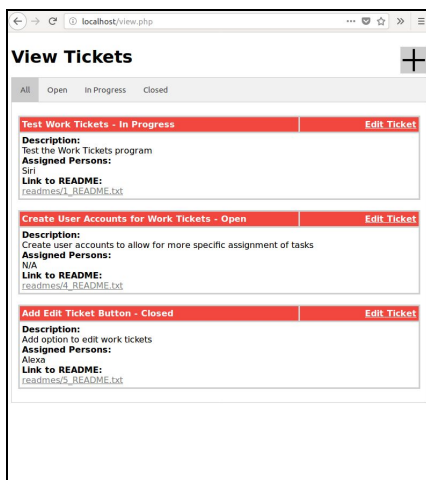

What it Does

This is a project intended to be used in a classroom setting. It is designed to give a teacher the ability to create and assign work tickets for their students using a LAMP Stack server.

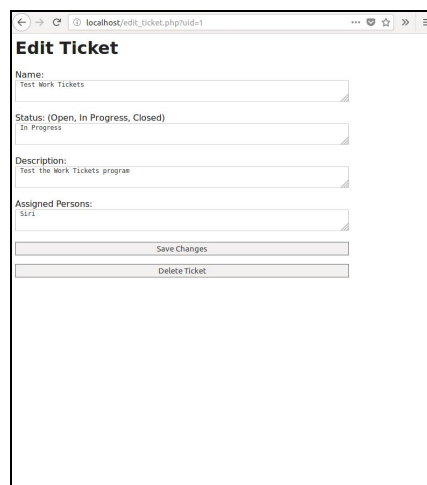

Some main features include:

- Create work tickets including the parameters Name, Status, Description, and Assigned Persons.
- Create a README for each ticket, and offer the option to edit that README in a browser.
- Edit or delete work tickets as needed, changing any of their key parameters.
